DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 5, 6, 8, and 9 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 15 of U.S. Patent No. 6,840,735 to Yaegashi et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because the Yaegashi pump comprises all of the structural limitations of the instantly claimed blood pump. The Yaegashi pump fails to disclose the actions of the control mechanism as instantly claimed, but it is the position of the examiner that a controller that is capable of monitoring and supplying power to the electromagnets as claimed by Yaegashi is capable of being programmed to operate as claimed by applicant. Such a reprogramming fails to represent a patentable improvement over the Yaegashi device.

Allowable Subject Matter

3. Claims 2-4 and 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, upon overcoming ODP rejection of the independent claim. Claims 1, 5, 6, 8, and 9 would be allowable over the prior art upon the submission of a Terminal Disclaimer as explained above.

4. The reasons for indicating allowable subject matter may be found in the non-final rejection mailed 19 July 2007.

Response to Arguments

5. Applicant argues that the non-statutory obviousness-type double patenting rejection over claims 1 and 15 of US 6,840,735 to Yaegashi et al is in error because there is no common ownership between the prior patent and the instant application. However, one common assignee or owner is enough to establish common ownership. Furthermore, MPEP 804(I)(A) provides that "Double patenting may exist between an issued patent and an application filed by the same inventive entity, or by a different inventive entity having a common inventor, **and/or** by a common assignee/owner" (emphasis added). Since the instant application has a common inventor with the issued patent, the rejection is proper.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
